

## Is TrueEASE Right for You?

Use this checklist to find out. TrueEASE is highly recommended if any of the following apply.

### You ever experience:

- Dry skin or respiratory issues
- Unpleasant shocks from carpet or electronics
- Static cling

### Your home has:

- Hardwood flooring and wood furnishings
- Paintings, artwork or musical instruments
- High utility bills

### Your existing humidification system:

- Runs loudly
- Wastes a lot of water
- Doesn't provide adequate humidification

TrueEASE humidification systems are backed by a 5-Year Warranty. Ask your heating and cooling professional about selecting the right TrueEASE model for your home.

The ideal humidifier should treat your whole house, improve comfort, reduce energy costs, conserve water, operate quietly and be easy to maintain. Only Honeywell TrueEASE humidifiers do it all.

## Easy to use. Easy to enjoy.

1.

### Check display

The Change Pad indicator light on the front lets you know exactly when replacement or service is needed.\*

2.

### Change filter

The replacement pads can be easily accessed from the front or either side. The slide-out pad design means you won't have to disassemble the humidifier or interact with the plumbing in order to change the pad.

3.

### Enjoy whole-house comfort

Because humidified air feels warmer, you'll be able to cut energy costs by turning your thermostat down while still feeling comfortable.

# TrueEASE™

The most flexible, most efficient line of evaporative humidifiers

## Saves Water. Saves Energy. Saves Money.

When your HVAC system is running, typical whole-house humidifiers constantly cycle water and air through, sending three to four gallons of water down the drain for every one gallon delivered as humidity.

TrueEASE says goodbye waste and hello efficiency by automatically monitoring the dryness in your home, and then only running water and air through the system when humidity is needed — cutting water waste up to 50%\*\* and saving energy by eliminating the constant cycling of air.

And that's just the beginning. Because humidified air feels warmer, you'll be able to cut energy costs by turning your thermostat down while still feeling comfortable.

Basic Bypass Model

Advanced Bypass Model

Fan-Powered Model

\* 50% less on Fan-Powered TrueEASE, 30% on Advanced Bypass TrueEASE  
Up to 50% less water waste on Fan-Powered and up to 30% less water waste on Advanced Bypass TrueEASE models.  
Based on a continuous run time of 24 hours with system specifications set according to ASHRAE Guideline 610.

# Which TrueEASE humidification system is right for you?

## TrueEASE Advanced Bypass Humidifier

### Quiet Operation<sup>P</sup>

44-48 dB compared to the 67-72 dB of other brands, decreasing operational noise.

### Up to 30% Water Savings<sup>P</sup>

Timer-metered solenoid wets the pad only as needed, reducing water waste by as much as 30% and saving up to 5,500 gallons of water per year.\*\*

### Energy Savings<sup>P</sup>

Automatic damper opens and closes only when humidity is needed rather than constantly cycling air through the bypass, making the HVAC System more efficient.

## TrueEASE Fan-Powered Humidifier

### Up to 50% Water Savings<sup>P</sup>

Timer-metered solenoid\* wets the pad only as needed, reducing water waste by as much as 50% and saving up to 10,000 gallons of water per year.\*\*

### User-Friendly Pad Access

Easy slide out design means there's no disassembly of the humidifier or interaction with plumbing needed to change the pad.

### The Quietest Residential Fan Humidifier on the Market

The centrifugal wheel and propeller fan design makes TrueEASE quieter than standard variable-speed HVAC systems, and more than 20 dB quieter than equivalent competitive residential fan humidifiers.

## TrueEASE humidification systems feature:

**PerfectFLO™ Water Distribution Tray<sup>P</sup>**  
Distributes water evenly across the pad.

**Common-Sense Interface**  
LED lights indicate when the system is humidifying, when it's time to replace the pad, and when the unit needs service.

**AgION® Humidifier Pads**  
feature an anti-microbial coating to inhibit the growth of molds, bacteria, fungus and algae on the pad.
